

Google Map Key

Adding a Google Maps API Key to LAMS.

This procedure is used to incorporate Google Maps into the [Gmap](#) activity.

A user with **System Administration** privileges must perform this operation.

You will also need an active Google account to receive the API key.

1. Navigate to the [Google Maps API registration page](#).
2. Make sure you click the check box to agree with the **Terms and Conditions**
3. Enter the URL of your lams server.
IMPORTANT! You **must** include the full location of the server, for example <http://translations.lamscommunity.org/lams/>
The API key will not work unless you include the ... **/lams/**
4. Sign in with a Google account.
5. Copy the text in the box titled *Your key is:*
6. Log into LAMS using a System Administration account.
7. Open [Sys Admin](#)
8. Open [Tool Management](#)
9. Scroll down to the **Gmap** tool and click [Tool Management](#).
10. Paste in the API key.
11. Click **Save**

And you're done!

LAMS will now provide Google Maps as requested by the [gmap](#) activity
