

Accessibility

LAMS must be *accessible* in accordance with the W3C and (US?s) Section 508 guidelines. In the first instance we are trying to achieve Level A conformance to the Web Content Accessibility Guidelines 1.0 from the W3C.

Please read the attached document for details on making LAMS accessible. It was written for LAMS 1.0.1 but the principles are still valid for version 2.0.

Changes in LAMS 2.4
