## Google Maps Monitoring

### Summary Screen

V  
i  
e

#### **w of the Gmap Monitoring Summary tab.**

Double Clicking a *Gmap* activity on the *Sequence* or *Leamers* tab opens the Summary Screen for the Activity.

The summary screen displays all of the map markers added to the activity, and also allows monitors to add, edit and remove map markers.

Map markers can be filtered according to the groups participating in the activity, and individual markers can be highlighted by clicking on a username in the right column.

In the user list on the summary screen, **Authored** map locations indicate markers that were set in the authoring environment as part of the sequence.

### Instructions

V  
i  
e

#### **w of the Gmap Instructions tab.**

In the Authoring Environment, Authors can use the **Instructions Space** to attach support files for a specific activity, or leave comments for other Monitors about how a given activity should be run.

These instructions can be viewed by monitors for this tab.

### Edit Activity

Clicking the **Edit Activity** button opens a new screen identical to the *'Basic'* tab in the authoring environment.

Here, the monitor can make changes to the content of the activity, such as the title and any instructions.

Unlike **Live Edit**, this form of Editing can only modify the content of an activity, as opposed to the structure of a sequence.

## Statistics

V  
i  
e

*w of the Gmap Monitoring Summary tab.*

The *Gmaps* Summary tab displays the total number of learners in the sequence as well as the number of learners who have completed the mapping activity.
