

Roadmap

LAMS 3.1 is the current release (December 2018)

- [Play with Demo](#)
- [Feature list](#)
- [Build this version](#)
- See [Roadmap](#)

End of life support: **30-June-2020** (for all v 3.1.x releases)

Development Releases: **LAMS v3.2**

LAMS 3.2 is under development.

Expected release: June 2019

Future Releases

LAMS 3.2

In this release we will focus

- Question Bank
- Assessment analytics
- New Assessment question types
- Import questions from various file types (doc, xls, txt, etc)
- New Authoring templates
- Antivirus plugin

[Suggest features to implement in GitHub](#)

Past Releases

LAMS v3.0

- *Responsive interface*
- *Significant usability and technical improvements*
- [LAMS 3.0 Feature List](#)

End of life support: 30-June-2019

LAMS v2.5

- *Tools inputs and outputs (ability for tools to communicate and exchange data)*
- *No more Flash interface for learner and monitor*

End of life support: 30-June-2017

LAMS v2.4

Unknown macro: {sub-section}

- [Conditional lesson release](#)
- [Scheduled and instant notifications](#)
- [Date restrictions for lessons](#)
- [Mobile devices support for learners](#)

- [Lesson introductions](#)
- [Date restrictions on activities](#)
- [and over 400+ fixes and improvements](#)

Tools

- [Wookie widgets tool](#). Based on [Wookie server integration](#)
- [Webconferencing integration with](#)
- [IMS Common Cartridge and IMS Basic LTI](#)
- [Kaltura video integration](#)

Technical

- [Upgrade to JBoss5.1](#)
 - [Upgrade to Hibernate 3.3](#)
-

LAMS v2.3

- [Massive performance increase](#). Now LAMS 2.3 uses **a quarter of RAM memory** and runs **375% faster** in comparison to previous versions ([further info](#))
- [New simplified "adding lesson wizard"](#). Only three clicks to create a lesson.
- [A drawing board](#) in all activities ([FCKeditor plugin](#))
- [Integration with the LAMS Community](#)
 - [Import sequences directly into LAMS Author from the LAMS Community](#)
 - [Share your best sequence with everyone in the LAMS Community](#)
- [Public shared folder](#) (all authors system wide can share with each other their designs)
- [Instant Messaging in sequences](#)
- [Added browser support for Google's Chrome and Safari 4](#)
- [A neat new Gradebook!](#)
- [Export activity results to other Gradebooks](#) (Moodle, Sakai, .LRN and other integrations)
- [Evaluation \(Evalcomix\)](#)
- [Support activities](#)
- [Equation Editor based on LaTeX](#)
- [Upgrade to fastest HTML online editor](#)
- [Graphs and charts to monitor learner's time in activities](#)
- [Dates localization](#). All dates and times are displayed according to the user's profile time zone

Tools

- [Video Audio Recording!](#)
 - [Pixlr Tool](#)
 - [Image gallery](#)
 - [New Assessment tool with gradebook integration](#)
 - [Mindmap tool!](#)
-

LAMS v2.2

Released: May 25, 2009

- **Gates**
 - [Gates are open for individuals](#)
 - [Gates can open on learner's output](#) (ie: if the student got 5 or more in the quiz, let him thru)
- **Grouping - Student selected branching**.
A new type of grouping where students get to select which group they want to join.
- **Presence**
While doing a lesson, students and teachers can view who else is doing the activities with them.
- **Learning Objectives (Competence) editor**
Teacher can setup learning objectives in sequences
- **Conditions and branching based on Tool's text output**
Q&A, Forum, Survey, Notebook and Chat now can be used in branching and the teacher can specify conditions based on students' text outputs (ie: if the student said these keywords then it goes to this branch).
- [Notifications](#) (automatic notification emails when events occur)
- **External tool wrappers**: Use LMS tools (Moodle, .LRN, Sakai) as native LAMS tools!

Tools

- [Online Spreadsheets](#)
- [Google Maps](#)
- [Data collection](#)

- [Wiki](#)
 - [Dimdim](#) a Whiteboard, share desktop and conference tool ([Dimdim integration](#))
-

LAMS v2.1

Released: [June 19, 2008](#)

- [Download it!](#)
- [Feature List](#)
- [Release Notes](#)
- **Conditionality and branching**
 - **Teacher selected branching**
(i.e.: once a student gets to the branching activity, the teacher decides which branch the learner will take)
 - **Group based branching**
(i.e.: members of Group1 go to Branch A, Group2 goes to Branch B, etc)
 - **Tool output branching**
(i.e.: learners that got more than 8 in the MCQ, then go to Branch A; learners with less than 8 go to Branch B)
- [Better help and support](#)
- **Grouping** Teacher now can set the group names in Author
- [Sequenced activities within Optionals](#)
- [Collapsible Course page](#)
- [Tool Conditions](#)
- [LDAP support](#)
- [Task list tool \(new tool!\)](#)
- [Insert sequence into other sequences \(merge\)](#)
- [Online media player](#)

Integrations

- [Blackboard 7.3](#)
- [WebCT Vista Powerlink](#)
- [Sharepoint](#)

Do you have a wishlist of your own for LAMS? please let [us know](#)

LAMS 2.1.1

Released: [September 05, 2008](#)

- Fixes problem with [Chat tool in Firefox 3](#)
 - Updates translations up to Sept 5th, 2008.
-

LAMS v2.0

Released [December 6, 2006](#).

- [Internationalization](#)
- [Rich text editor](#)
- [Workspaces and folders](#)
- [Content Repository](#)
- [Runs activities online and offline](#)
- [New groupings](#)
- [Lesson Wizard](#)
- [New Authoring Property Inspector](#)
- [New look and feel](#)
- [Skins and styles](#)
- [Scheduling](#)

See [LAMS 2.0 Feature List](#)

See [Release Notes](#)

LAMS V2.0.1

Released: [March 9, 2007](#)

- [Bug Fixes](#)
- [Internationalization improvements](#)
- [Integrations additions](#)
- [Import users and courses from LAMS 1.0.x servers](#)

- [Survey export raw data as Excel files](#)
- [Improvements for skins](#)
- [and more](#)

See [Release Notes](#)

LAMS V2.0.2

Released: **March 23, 2007**

- [Fix critical internationalization issues 1 2](#)
- [Remove yellow as a colour in chat](#)
- [Fix export portfolio](#)
- [Fix internationalization issues with Greek, Korean and Arabic](#)
- [Improve installer/upgrader to work with XAMPP](#)

See [Release Notes](#)

LAMS V2.0.4

Released: **June 04, 2007**

- [Live Edit](#) (Ability to modify LAMS lessons while they are running i.e.: change an activity, add a new ones, etc. Previously known as [Edit On The Fly](#))
- [Fixes for Moodle and Sakai Integrations](#)
- [50+ Bug fixes](#)

Integrations

- [Moodle](#)
 - [Sakai](#)
 - [.LRN](#)
-
