Welcome!

This animation will demonstrate Authoring, Learning and Monitoring in a Moodle/LAMS integrated environment.

To add a new LAMS Sequence to a Moodle Course, the first step is to turn on Edit Mode in Moodle.

This enables you to add LAMS Activities to the Moodle Course.

To add a LAMS Activity, select the 'LAMSv2' option from the Activity menu.

This creates a 'container' for LAMS sequences.
One LAMS Activity in Moodle can contain one or more individual LAMS sequences.

This text here is displayed as part of the 'Container'

We add the LAMS Sequences in the next step.

Okay, the container is set up.

Moodle is telling us that there are no sequences here yet, so let's open Authoring and create a new one.

This opens the full LAMS authoring environment.

Depending on how your Moodle|LAMS integration is set up, you may be able to use Moodle tools as part of your LAMS sequence. (This is covered in a separate tutorial.)

I'm going to quickly create a LAMS sequence for our students to work through,
but you could easily import an existing sequence from another LAMS server, or straight off the LAMS Community.

Okay, the sequence is ready to be saved.

We're done working with LAMS for the moment, so let's head back to Moodle.

Even though we now have a sequence in LAMS, we still need to add it to Moodle.
Click 'Add New Lesson' to make the new LAMS lesson.

Title:
NumCallouts: 0

Frame: 40
Title:
NumCallouts: 0

Frame: 41
Title:
NumCallouts: 1

This title is displayed by Moodle, independantly of the LAMS sequence.

You can also add some introductory text for learners.

Frame: 42
Title:
NumCallouts: 1

The next step is to select the LAMS sequence.

The files and folders shown here are taken directly from your account in LAMS.

NumCallouts: 0

Frame: 50
Title:
NumCallouts: 1

Here it is - ready to go!

Frame: 51
Title:
NumCallouts: 1

Let's see it from the Learner's perspective.....

Frame: 52
Title:
NumCallouts: 1

The Learner sees the LAMS activity in the Moodle course...

Frame: 53
Title:
NumCallouts: 0
And from here they can jump straight into the Learning environment in LAMS...

Here's our new sequence...

Back with the teacher now; We're going to look at how to access the Monitoring environment using Moodle. 

Open up the Activity which contains the Sequence you wish to monitor.

It's just one-click away...

LAMS launches the full Monitoring environment from within Moodle.
Finally, let's look at some other operations you can perform with LAMS and Moodle.

Using the 'Activities' sub-menu, you can see a list of every LAMS activity in the Moodle course.

These are all the LAMS containers in the Moodle course.

From here, you can open each activity and see the sequences inside.

You can also add additional lessons to LAMS activities.

This is another sequence saved in my LAMS account.
I'm going to add it to the same LAMS activity as part of the Moodle course.

Now when the learner reaches this LAMS activity, they can choose which lesson to work through.

For more information, or to try out the Moodle/LAMS integration yourself,
