

Time and Date Restrictions

A new feature in LAMS 2.3.4 allows Monitors to specify an 'end point' for selected activities. What this does is effectively lock learners out from further contributions to specific activities.

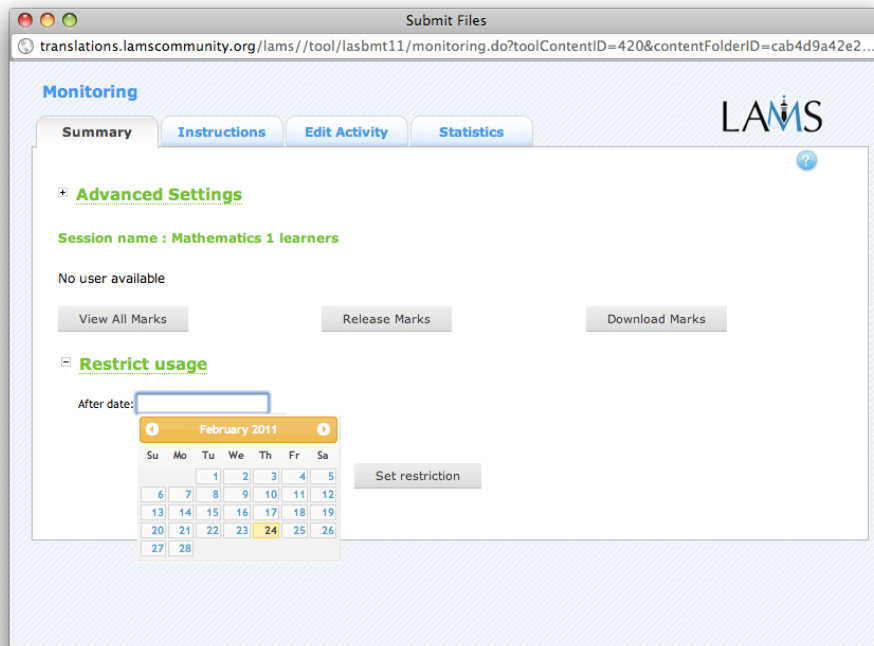

Limitations

Currently, this feature is only available for [Submit Files](#), [Multiple Choice](#), [Chat](#), [Voting](#), [Notebook](#), [Task List](#), [Mind Maps](#) and [Assessment](#).

Adding a Date/Time Restriction to an Activity

1. ⚠ First, you need an active running sequence. You can only set Date/Time Restrictions from within Monitoring, not the Authoring environment.
2. Open the sequence in Monitoring, then, on the [Sequence](#) tab select the activity you want to restrict.
3. Expand the "Restrict Usage" section, then select your desired date and time from the calendar:

4. Click **Set Restriction** and you're done.
 - a. Now when Learners access the activity **BEFORE** the restriction, LAMS will display:

The teacher has set a restriction for submission from (Whatever Date and Time you have selected.)

- b. After the restriction, the message will change to:

The teacher has set a restriction for submission from (Whatever Date and Time you have selected.)

In addition, none of the controls for the activity will be active.

Removing Restrictions

To reverse the restriction (in other words, unlocking the activity) go back to the activity in monitor and click **Remove Restriction**.
